M360iSEC

Company Profile

It's nice to e-meet you

About M360iSEC

Cybersecurity and resilience.
Protecting the digital future.

M360iSEC unwavering commitment to cybersecurity has propelled the company to the forefront of the industry. By prioritizing robust security measures and fostering a culture of vigilance, **M360iSEC** has consistently delivered exceptional results for its clients.

Company Purpose

Our unique combination of cybersecurity consulting, technical expertise, assurance services, and regulatory compliance support helps organizations build robust digital defenses and resilience. This empowers them to protect their critical assets, inspire trust in their products and services, and contribute to a more secure digital world.

Our Purpose: to inspire trust for a more resilient world.

Company Vision

Cybersecurity and Sustainable Digital Transformation

Our approach to cybersecurity enables organizations to achieve more with less impact. By fortifying digital resilience and optimizing security measures, we help our clients navigate the path to a sustainable, low-risk digital future. As cybersecurity ambassadors, we recognize that digital sustainability encompasses not just carbon footprint, but the holistic protection of critical systems and data. Together, we can build a more secure and environmentally responsible digital society.

Protect with Integrity

Act with Cybersecurity Ethics.

Verify Authenticity

Maintain Digital Integrity.

Protect Proactively

Enhance Digital Security.

Company Mission

Protecting and Educating Users.

We develop innovative cybersecurity solutions that empower individuals and organizations worldwide, fostering a safer digital environment through our expertise and services.

Our Services

Empowering Cyber Resilience.

We offer a full spectrum of services to help organizations work better. We create standards of excellence and help you achieve them.

Our Services
Vulnerability Assessment

01.

Digital Infrastructures, Websites & Mobile Applications.

M360iSEC provides Cyber Security Assessment services for applications and IT infrastructure. The Cyber Security Assessment service is based on specific industry standards and globally recognized cybersecurity.

Frameworks to deliver reports that scan for vulnerabilities and security gaps, helping your organization strengthen your defenses to comply with global cybersecurity regulations and standards.

Protect your reputation and supply chain with our audit and verification services.

Our Services
Penetration Testing

02.

Cyber security, risk and supply chain management.

Our penetration testing services provide a holistic approach to identifying and mitigating security weaknesses across your digital infrastructure. By leveraging a team of seasoned cybersecurity experts and state-of-the-art testing tools, we conduct thorough assessments to expose vulnerabilities that could be exploited by malicious actors.

Software tools and solutions for governance.

The integrated technology solution that inspires trust.

Our Services

Physical Red Team

03.

Involves simulating an attack on an organization's physical assets, such as buildings, equipment, and infrastructure, to test its ability to defend against physical threats and identify vulnerabilities in its physical security controls.

Physical Red Teaming is a critical component of comprehensive security testing, alongside assessments of digital systems and personnel, to provide organizations with a holistic view of their security posture and readiness to withstand various types of threats.

Enhance Physical Security, Safety, and Resilience.

Our Services
Digital Forensic

04.

Our team has conducted a large number of high-profile matters in civil and criminal proceedings, incident response investigations, including analysis of advanced malware engineered by sophisticated state-sponsored attackers. Our digital forensics lab and client-centric team offer a tailored solution for your digital forensic investigation requirements.

Our digital forensics experts have played a key role in a wide range of criminal cases involving a digital element, including organized cybercrime, online money laundering schemes, cyberstalking, data breach litigation, digital extortion, ransomware hacking incidents, DDoS attacks and more.

Protect your digital assets and supply chain integrity with our comprehensive digital forensics services.

Our Services

E-Mail Phishing

05.

M360iSEC Phishing-as-a-Service (PhaaS) is a fully-managed phishing programme designed for organisations who are concerned about their users' ability to accurately differentiate between a phishing email and a genuine one. Utilising the latest tools, techniques and designs malicious actors use, Cybergate will periodically launch phishing campaigns targeting your employees.

Examples of Phishing templates that are available:

- Paypal phishing templates
- Office365 phishing templates
- Facebook phishing templates
- Ebay phishing templates
- Amazon phishing templates

This will provide a comprehensive, continuous assessment of your organisation's exposure to phishing attacks.

Our Services

Brand protection & Dark Web Intelligence

06.

refers to data collected from the Dark Web and the Deep Web, used to combat fraud and cyber attacks. This intelligence encompasses information obtained from the hidden parts of the internet that are not indexed by conventional search engines.

It includes various types of data such as account credentials, payment card details, mule account information, targeted attack details, and vulnerability exploits.

Dark Web Intelligence is crucial for cybersecurity professionals to proactively identify threats, prevent data breaches, and stay ahead of cybercriminal activities by monitoring and analyzing information sourced from the Dark Web.

Safeguard your brand reputation and uncover hidden threats with our advanced brand protection and dark web intelligence services.

Industry
Sectors

We offer global solutions across a wide range of industry sectors. Discover the key issues and drivers for your industry sector as well as the services, standards and solutions to address those challenges.
